Dell service center near you Top reviews Most recent Top reviews Introduction and Specifications There was a time, not too terribly long ago, when a machine was immediately glossed over by average consumers as soon as the "business" label was placed on it. If you've worked in the corporate world within the past 10 to 15 years, you know exactly what we mean. Those dreaded "work laptops" were never ones to be proud of, and while they somehow managed to function, they were typically slow, overloaded with bloatware and unbecoming in terms of design. But things are different these days. Starting with the smartphone, employees began a quiet movement to bring their own devices to work. Eventually, by and large, they won when it comes to phones. Many enterprises are now completely comfortable with an employee using an Android or iOS-powered device as their main handset. And it seems as if they're taking the hint on other devices, too. Dell's latest Latitude range is proof that enterprise laptops are no longer being overlooked when it comes to power, performance and even design. While there are a variety of Latitude E Series options to choose from, our test unit is the 15.6" E6530. Even within this one model, there are a multitude of configuration options to choose from; let's take a look at how our unit came configured. For one, it's really rugged. There's a Tri-Metal casing that's as rigid as we've ever seen, and the keyboard is designed to resist spills -- sometimes all too frequent occurrences when traveling frantically on business. It's also a potent machine. A Core i7 paired up with 6GB of RAM and an SSD looks great on paper. We'll be taking this workhorse through its paces in the pages ahead -- join us. Related content Comments The Dell Latitude E6530 is a premium notebook. The card reader is easily accessible. The optical drive can be replaced with other modules. The mechanism is very user-friendly. Any missing ports can be upgraded via the ExpressCard slot. ExpressCards/34 and ExpressCards/54 are supported. An eSATA port is still a rarity. The modem port is optional. The USB port on the back has a charging function. The hard drive is easy to reach. The battery has a capacity of 60 Wh. Only removing the bottom cover.....allows access to hardware components such as the RAM slots. The fan can be cleaned easily. The UMTS slot did not recognize our mSATA SSD. The power supply is rated at 65 W. The power connector is not angled. The display hinge cannot completely prevent teetering. It is specifically designed for the business sector. Some of the features can be found only in business laptops. The casing materials make a good impression. The hardware components are not advertised on our test model. The interface equipment is extensive. The ports are well positioned. A Smart Card reader is also on board. The air vent reached a maximum of 38 °C. The display can be opened to 180 degrees. Workmanship is flawless. The LEDs lighting is subtle... ..and looks well on the dark gray background. The fingerprint scanner is available only with a surcharge. More status LEDs are located at the back. Even the webcam costs extra. *Device comes with Windows 10 and a free Windows 11 upgrade or may be preloaded with Windows 11.
